

ABOUT US

Železničná spoločnosť Cargo Slovakia, a. s., (ZSSK CARGO) is the largest network-wide provider of rail freight transport services in Slovakia. We provide services not only on main and regional lines, but also on broad gauge lines in eastern Slovakia. As an independent company, we have been operating in the market since 2005, but our activities follow more than 180 years of history of railways in Slovakia. The sole shareholder of our company is the Slovak Republic, on behalf of which the Ministry of Transport of the Slovak Republic acts.

We offer our customers a wide portfolio of services directly related to the operation of rail freight transport (including rail freight as part of combined transport), as well as services at the junction of 1,435 mm and 1,520 mm gauge lines. Our second main product is services related to maintenance and repairs of rolling stock and its rental. We are the largest ECM service provider in Slovakia.

The quality of our services is confirmed by several certificates in accordance with international standards ISO 9001 and ISO 45001.

Since 2018, we have been an AEO (Authorised Economic Operator) status holder.

RAIL FREIGHT TRANSPORT SERVICES

The transport of wagonload shipments is the main product of our company. We offer you:

- | transport in the form of single wagonload shipments, groups of wagons, block trains (including certified trains)
- | Intermodal transport (rail freight)
- | transshipment services in eastern Slovakia (the Combined Transport Terminal Dobrá) and in Bratislava (in preparation)
- | the transport of cars
- | the transport of dangerous goods
- | transport of exceptional consignments
- | siding services

In addition to basic services, we also provide a wide portfolio of additional services, such as:

- | submitting a shipment for transport on behalf of the customer
- | shipment weighing at an en-route station
- | making and sending photocopies of transport documents
- | re-submission of a shipment and related services
- | making a change to the contract of carriage
- | reporting on the progress of the shipping process
- | wagon sealing
- | marking of wagons with danger labels according to RID or Annex 2 to SMGS
- | customs clearance operations

TRANSPORT OF AUTOMOTIVE

Our dedicated automotive team will take care of the fulfilment of requirements of customers not only from Slovakia, but also from all over Europe. Together with European railway companies and in line with our customers' interests, we are involved in securing the transport and complying with their demanding logistics.

Our clientele consists particularly of the main partners of Slovak automotive companies that own special wagons for the carriage of cars.

ZSSK CARGO provides a package of services:

- | one contact partner for the entire transport route
- | siding track advising and servicing
- | contract, invoicing, complaint procedure in one place
- | logistic trains quality and guaranteed delivery periods
- | information service about shipments in transportation
- | flexibility in ordering and cancelling trains
- | short-term parking of empty wagons
- | cooperation with specialised providers of services for the carriage of cars

PRIVATE SIDING SERVICES

Private siding services are support services for customers who own, operate or use private sidings to load and unload shipments transported by rail by our company.

Traffic services:

- | siding track operation and the placing-in of wagons to the agreed wagon interchange position and vice versa, ensuring the necessary shunting within the given operation
- | shunting operations on the siding track during an agreed period of time or for an agreed range of services other than operation

Additional services:

- | advice on the operation of private sidings
- | siding maintenance

Operation of a private siding:

- | ensuring the required technical condition of the siding equipment
- | carrying out professional supervision on the siding
- | drawing up the relevant regulations applicable to the siding
- | the organisation of transport on the siding
- | siding equipment operation
- | carrying out shunting operations on the siding to ensure all transport needs of users

TRANSSHIPMENT SERVICES

On the Ukrainian-Slovak border, where broad and standard gauge lines of 1,520 mm/1,435 mm meet (Čierna nad Tisou, the Combined Transport Terminal Dobrá), we provide comprehensive services related to the gauge change as well as to the change of the law of carriage of goods (SMGS/CIM).

Gauge change:

- | transshipment of goods
- | the re-pumping of goods
- | defrosting bulk substrates

Change of the law of carriage of goods:

- | reporting on the progress of the shipping process: arrival, transshipment and dispatch of the shipment
- | photocopies and scans of transport documents
- | issuing consignment notes
- | taking over and submitting accompanying documents
- | ensuring that transport documents are sent
- | official counting of pieces
- | making a change to the contract of carriage
- | submitting shipments for the transport of empty and loaded wagons
- | completion of customs formalities in the country of dispatch, transit and destination
- | wagon sealing
- | marking of wagons with danger labels according to RID or Annex 2 to SMGS
- | shipment weighing

Auxiliary services:

- | load fixing and adjusting
- | storage
