

# Železničná spoločnosť Cargo Slovakia, a. s.

## ABOUT US

Železničná spoločnosť Cargo Slovakia, a. s. (ZSSK CARGO) is a freight transport operator which was established in 2005 after division of its mother company. Our business follows up 180-year long history of railways in Slovakia. Rights of the Government being our shareholder are executed by the Ministry of Transport of the Slovak Republic.

To our customers we offer a wide portfolio of rail freight transport services. In addition to the core product - transport services, we also engage in the rental, maintenance and repair of rolling stock and other activities related to rail freight transport. We are the largest and only network-wide provider of such services in Slovakia.

Our goal is to be your stable business partner, whose services have high quality and are safe, reliable and environmentally friendly, and to whom you will be happy to return. Your satisfaction is our first priority.

### **The quality of our services is confirmed by several certificates in accordance with the international standard ISO 9001 Quality Management System:**

- Railway freight transport and transportation,
- Rolling stock maintenance and repairs, storage and distribution of goods,
- Ensuring professional qualification and education of the employees.

### **In addition, we hold certificates also for following products:**

- Managerial system of work safety and health protection at work (certificate in accordance with the international standard ISO 45001),
- Certificate of Conformity of Entity in Charge of Maintenance,
- Certificate of Conformity of Maintenance Functions,
- Facility Security Clearance Certificate,
- Welding of railway vehicles and components: classification level C1 in the type of activity M.

Since 2018 ZSSK CARGO holds AEO (Authorised Economic Operators) status.

## RAIL FREIGHT TRANSPORT SERVICES

Transport of wagonload consignments is the core product of our company. We offer you:

- transport of single wagonloads,
- transport of group of wagons,
- transport of block trains, including certified trains,
- intermodal transport (rail part),
- transport of automotive,
- transport of dangerous goods,
- transport of special shipments,
- siding services.

Besides basic services we also offer wide portfolio of supplementary services such as:

- handing in of the consignment for conveyance on behalf of the customer,
- weighting at the intermediate station,
- supply of copies of consignment documents and their dispatching,
- carrying out of new handing in of the consignment and related activities,
- supply of proposal for modification of the contract of carriage,
- handing in of the report on the course of consignment carriage,
- sealing of wagons,
- labelling of wagons with stickers for indicating danger according to RID or Annex 2 of SMGS.

## PRIVATE SIDING SERVICES

Private siding services are support services for customers who own, operate or use private siding for loading and unloading shipments transported on railways by our company.

We provide the following private siding services:

### **Traffic services:**

- supply of wagons transported on railways and intended for private siding, from railways to the private siding and back,
- shunting wagons at the private siding according to customer's requirements.

### **Supplementary services:**

- consultancy in the area of private siding operation,
- construction and maintenance supervision at the private siding,
- other supplementary services such as mowing alongside the tracks, cleaning and lubricating of switch points and derailing points, snow removal.

### **Private siding operation:**

- ensuring the permission for private siding operation,
- ensuring the required technical condition of the private siding,
- drawing up of regulations governing the private siding operation,
- operation of the private siding equipment,
- organization of the traffic at the private siding,
- shunting at the private siding according to customer's requirements,
- other services related to actual operational circumstances.

## INTERMODAL TRANSPORT

This mode of transport reduces the road system loading and saves the environment, provides higher protection of transported goods against loss and damage, simplifies manipulation with goods, using one manipulation unit. At the same time, it enables delivery of consignments to combined transport terminals by block trains, being exactly on time as well as usage of single wagon shipment system if the customer requests so.

Within the intermodal transport, ZSSK CARGO is focused on rail freight services (including transshipment services in our own Combined Transport Terminal Dobrá). We provide customer's needs analysis, transport planning and management, offers for transport, contracting of transport, transportation, business, tariff, technological and technical conditions, implementation of respective services.

## TRANSPORT OF AUTOMOTIVE

In automotive industry, ZSSK CARGO participates in providing a significant share of transport services within the logistics chain of all automotive producers located in Slovakia, where we carry out transportations from as well as to the factories.

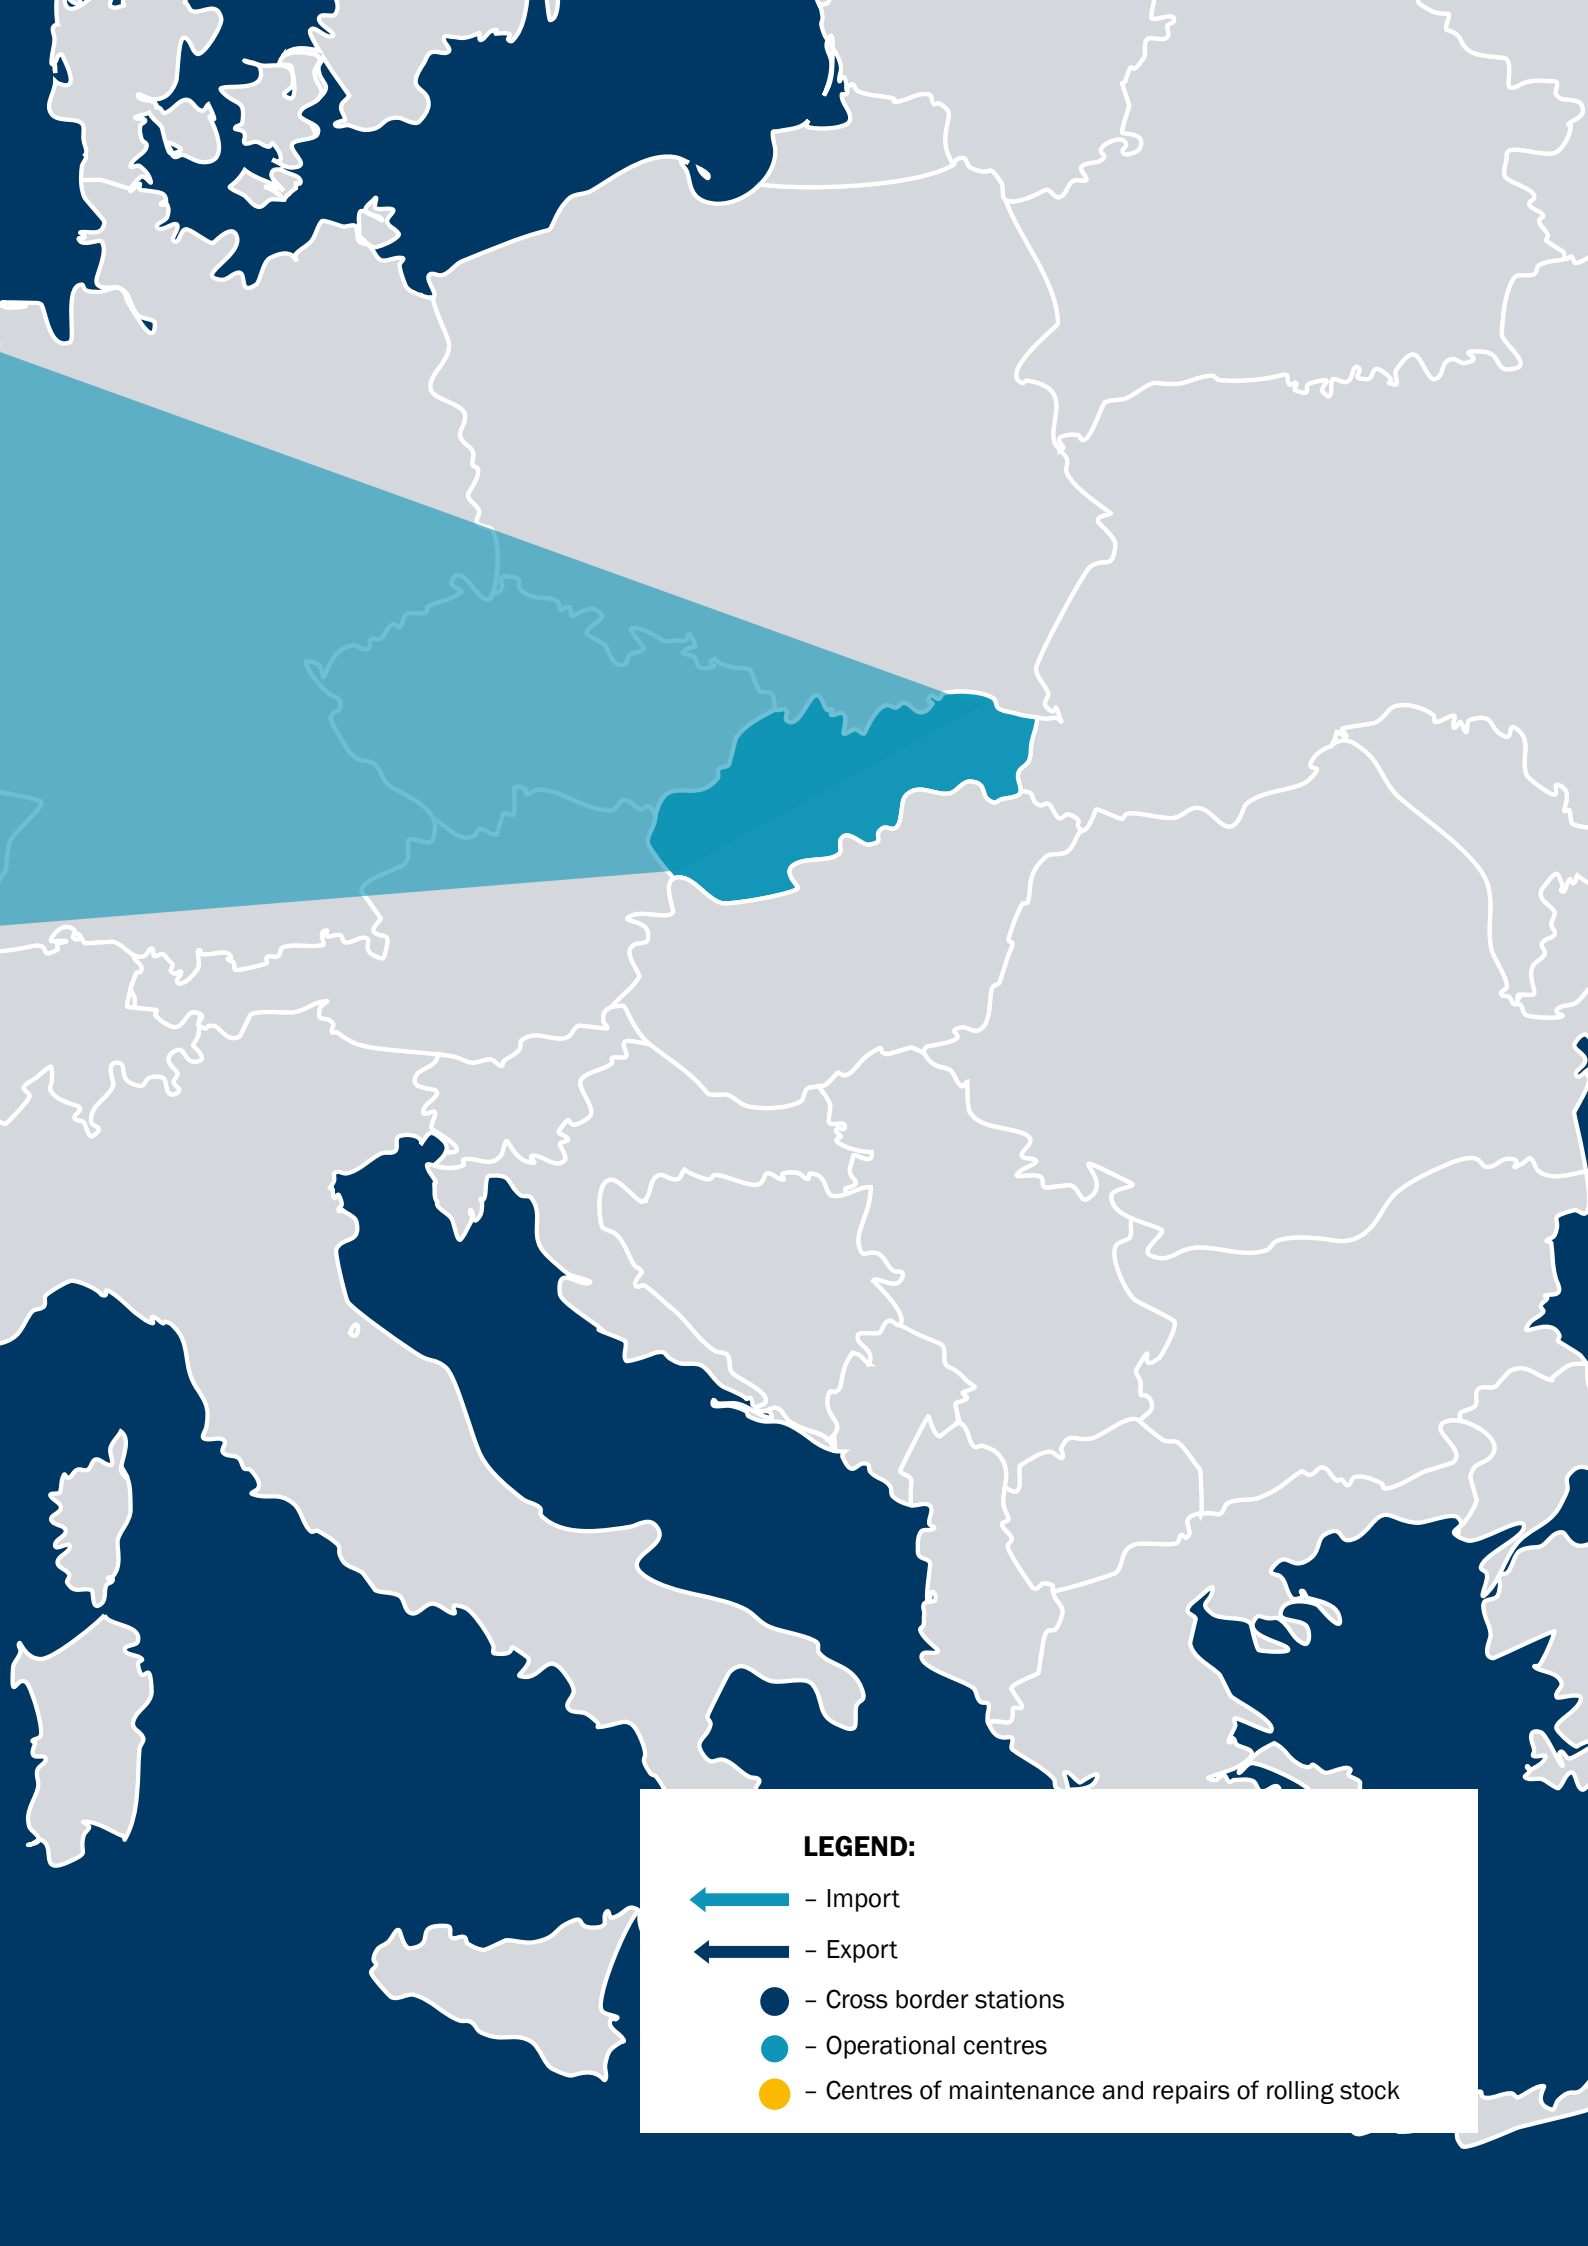

Transport services are provided by our own capacities.

We offer:

- providing transport with optional routing according to customer's requirements,
- co-ordination of partners involved in transport,
- logistics delivery of consignments to handling areas at private sidings,
- provision of technical means for required daily load transport,
- grouping of wagons of departing trains and their technical preparation for departure,
- commercial dispatch of departing trains, issuing of transport documentation, sealing of wagons,
- customs clearance of consignments to non-EU countries,
- optimization of routing of finished products.

**LEGEND:**

← - Import

← - Export

● - Centres of maintenance and repairs of rolling stock

## TRANSSHIPMENT SERVICES

Activities in the area of transshipment of goods and ancillary services are provided at the transshipment facilities on the east of Slovakia (East Slovak Transshipment Yards, Combined Transport Terminal Dobrá). The offer includes the entire range of services related to transfer of consignments from broad gauge to normal gauge, and vice versa.

We provide following services in the East Slovak Transshipment Yards and Combined Transport Terminal Dobrá:

### Change of traffic conditions:

The change of traffic conditions from SMGS to CIM, and vice versa, and related activities:

- new handing in of consignments for conveyance by change of traffic conditions,
- overall information on the entry, leaving, transshipment and departure of consignments.

### Gauge change:

- transshipment, re-pumping of goods,
- thawing of ore.

### Ancillary services:

- fastening and adjustment of cargo,
- storage.

## DEPO SERVICES

Depo services - services of maintenance and repair of rolling stock - are the second main product of our company. Services are provided in our own freight wagon repair workshops and locomotive depot located all over the national network.

We offer you:

### Maintenance of rolling stock:

- periodic maintenance of engines (operational maintenance, small inspections, large inspections, main repair),
- periodic maintenance of freight wagons (N2.X, N4, N8),
- planned maintenance (defectosopic inspections, regular technical inspections, diagnostic measurements, preventive inspections, adjustment of the running profile of wheelsets, the lathing of brake discs, the replacement of wheelset treads and others).

### Repairs of rolling stock:

- unplanned repairs of engines carried out within and also outside of periodic maintenance,
- corrective maintenance of freight wagons according to GCU,
- repairs without and with suspension of wagons,
- repair of chassis, spare parts, hydraulic buffers, electronic and other equipments
- changes to constructions – reconstructions, modernisations, operational modification.

### Other services:

- ECM services for wagons, locomotives and engine units,
- mobile service – decoupling of wagons, replacement of wheelsets, bogies, brake shoes and spare parts.
- breakdown trains – re-railing and transport of rolling stock, rolling stock cranes EDK 700 and EDK 300,
- technical inspection, safety inspection,
- testing and measurement services.

## ANCILLARY SERVICES

- rental of locomotives,
- rental of wagons,
- services of safety advisor,
- custom procedures on behalf of customer,
- monitoring of consignments,
- consultancy in the area of carriage of consignments,
- issuing licence for the production and repair of EUR-pallets,
- diesel supplies.
